24/10/2022 @ 18.53	24/10/2022	Smell

2. Complaints received by A Hughes

None

We arrived at 10.30 at Skellingthorpe Village Hall, we walked across the playing fields onto Church Road, then Jerusalem Road, across to Old Chapel Road and into Anson Close. There was no odour at all. Back onto Jerusalem Road and over the bridge there was a slight drain smell near the Bodywork garage. Walking towards A Hughes there was no odour and only a slight odour as we arrived on site. We were able to meet with the Operations Manager who explained that the commissioning of Thermal Oxidiser had been delayed due to availability of components (It was forecast to be operational by end of October 2022). The new commissioning date has been forecast for Easter 2023. Latest photos of the Oxidiser are shown below.

3.2 An Officer from Env Health made an odour survey visit on the 25th October 2022; "I parked up on old pits close, Jerusalem road, not far from Hughes and couldn't smell anything. As I walked over the Jerusalem bridge near the GW Bodyworks I got a faint smell getting stronger. I passed number 56/58 and the smell disappeared, I walked towards GW Bodyworks and the smell appeared again. It was a cooking cabbage smell, I really think it was coming from the drains. This was at 15.40 ish. I started turning into Daisy made, it had a large trailer overflowing with manure."

4. Updates from A Hughes

None, the Thermal Oxidiser is being installed as parts are received / shown last

Would like to log a complaint that it stinks visible smoke coming from chimney blow I live in Skellingthorpe Jerusalem road an issues
Like to log a report that the factory smell
Said that there is a strange whiff coming I
Said it's definitely from Hughes.
I like to log a report of the foul smell comi
